

Schenck rental service

To bridge unexpected outages

Schenck rental devices

1) MMD3 Rental device (measuring module)

- ▶ Installation by Schenck technicians advised
- ▶ Interference in the measurement chain (MMD = heart of signal processing)
- ▶ Revalidation of the machine using a certified working standard required with every MMD replacement
 - + after installation of the MMD3 service rental device
 - + after implementation of the modernization on MMD4

2) CAB plug-in units

- ▶ Customized mounting at the Schenck plant
- ▶ Installation by Schenck technicians advised
- ▶ Fast replacement without revalidation of the machine possible with a 1:1 rental device & availability of legacy data
- ▶ Revalidation of the machine by means of a certified working standard necessary when using a technically superior rental device
 - + after installation of the rental appliance
 - + after implementation of the modernization solution

3) Rental scales (ESC and ESD up to 20 kg, ESF up to 200 kg)

- ▶ Commissioning & revalidation of the rental scale and the repaired customer scale by a Schenck technician is mandatory
- ▶ Function test by Schenck after return delivery of the rental scale
- ▶ Repair of the customer scale within approx. 4 to 6 weeks
